

SUMMARY

I am a results-driven software engineer with one year of professional internship experience and a strong foundation in the Java/Spring ecosystem. Proven ability to design event-driven microservices, optimise database performance and implement CI/CD pipelines, as well as experience with NoSQL solutions. Seeking a junior backend developer role to leverage expertise in Kafka, Kubernetes and scalable system architecture.

DETAILS

DATE OF BIRTH: 10/03/2005

NATIONALITY: Belarusian

SKILLS

- Programming Languages: Java, Kotlin, Scala
- Frontend: JS, TS, React
- Spring Ecosystem: (Boot, Security, Data, MVC, Cloud, WebFlux)
- Relational SQL: PostgreSQL, MySQL
- Testing: JUnit, Mockito, Testcontainers, WireMock
- Messaging & Event Streaming: Apache Kafka, RabbitMQ

EXPERIENCE

- 06/2025 – 06/2026 Minsk, Belarus
Software Engineering Intern (Java Backend) | Innowise Group
 - Developed and maintained** scalable backend microservices for an enterprise retail system using **Java**, **Spring Boot**, and **Spring Cloud**, including the implementation of a secure API Gateway with JWT authentication.
 - Architected** event-driven communication between microservices using **Apache Kafka** to handle asynchronous order and payment processing, ensuring reliable data synchronization.
 - Optimized** database performance in **PostgreSQL** and **MongoDB**; reduced query response times by implementing strategic indexes and materialized views, and managed automated schema migrations using **Liquibase**.
 - Integrated Redis** caching to store user actions and session data, significantly reducing database load and improving overall API latency.
 - Ensured** code reliability by writing comprehensive unit and integration tests using **JUnit**, **Mockito**, and **Testcontainers**.
 - Containerized** applications using **Docker** and orchestrated deployments via **Kubernetes** and **Helm**, while improving **CI/CD pipelines** in GitHub Actions to automate code quality checks and troubleshooting.
 - Participating** in daily stand-ups, peer code reviews, and utilizing **Git** for version control.

EDUCATION

- 09/2023 Minsk, Belarus
Baccalauréat Général: Programming Engineering at the KSIS Faculty of Specialty | Belarusian State University of Informatics and Radioelectronics (BSUIR)
I am currently studying for a Bachelor's degree, and I am expected to graduate in June 2027.

- Database Tools & Change Data Capture (CDC):
Liquibase, Debezium
- NoSQL: MongoDB, Cassandra
- Caching: Redis
- DevOps & Containerization: Docker / Docker
Compose, Kubernetes
- CI/CD & Version Control
- Web Protocols: REST, SOAP, WebSocket
- Formats: JSON, XML, YAML, ENV, BSON
- Maven
- Gradle
